

TRIBÙ

LUCCA

STUDIO SEGERS

At first glance, the new Lucca collection feels instantly familiar, making it easy to love. Then dive deep, and subtle design details emerge. The armchair and lounge chair feature graceful silhouettes inspired by Japanese calligraphy, while the armrests and woven textile bands pay tribute to Southern braiding techniques. The soft fibre's core offers gentle stretch for enhanced comfort while sinking into its cushions. The dining table's shield-shaped supports and rounded ceramic top make it a timeless centrepiece, complementing any outdoor setting.

FABRICS & MATERIALS

MATERIALS

Frame: Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight. This makes it especially suitable for furniture. If treated correctly, it has a good resistance to corrosion. By powdercoating aluminium, this corrosion resistance can even be enhanced. After a chemical pre-treatment, an epoxy powder is applied statically and baked. Tribù always uses European, ultra-durable and scratch-resistant polyester powdercoatings that guarantee a UV-resistance of 15 years. For certain collections (Branch & Illum) parts of the frame are die-cast under high pressure which results in a seamless and extremely solid frame. Additionally, an extra epoxy primer coat is applied for these collections.

Back: Tricord® is a brand new composite material for which Tribù has exclusivity. It is a unique combination of nautical and synthetic fibres. The inside consists of unbreakable polyester that gives it strength and stability. The outside is a combination of nautical fibres that create a surprisingly soft touch and natural appearance. The composition of these nautical fibres (polyofin) makes Tricord® completely resistant to outside influences: frost, water, fungi and UV-rays. The furniture is hand woven - no two pieces are ever alike. The unique craft appearance is part and parcel of the charm of the product and cannot be regarded as a fault.

Seat: Batyline® is a polyester fibre which is coated with solution dyed PVC and then woven. The fibres are then melted together to create an extremely stretch and tear-resistant fabric that keeps its shape perfectly. Apart from its exceptional mechanical strength, it has a high chemical resistance. The synthetic coating guarantees an extremely high weather and UV-resistance. The fact that no moisture is absorbed, results in rapid drying, maximum stain and mould-resistance and simple cleaning. The most important feature is its pliancy and optimal seating comfort.

Top: Ceramic has been used for centuries for all kinds of purposes. With its unique characteristics it is the ideal material for outdoor table tops. Ceramic is UV-resistant, frost proof, extremely scratchproof and completely stain-repellent. The ceramic used by Tribù is coloured in the mass and guarantee years of carefree pleasure. The raw materials are selected very carefully by suppliers from Western and Southern Europe only. Every top is unique. For example, the Scisto colour may show subtle veins, but this is not the case for every top. The ceramic table tops are slightly bended so water can flow off.

CUSHIONS

The filling has a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

HOW TO MAINTAIN YOUR FURNITURE

MAINTENANCE

Powder coated aluminium is easy to clean with clear water and a pH-neutral fluid detergent. Stubborn stains can be removed with Coated aluminium & stainless steel Cleaner. If necessary, use a soft brush to remove the dirt from the pores. To protect the frame against the adhesion of dirt, Coated aluminium & stainless steel Protector can be used which applies an invisible protective film.

Before use, we recommend to treat the **Tricord® weave** with Textile Protector which applies an invisible, dirt and water repellent film. The straps can be cleaned with clear water and a ph-neutral detergent or Synthetics Super Cleaner. Allow the detergent to act for a while, then rinse abundantly with clean water. Drying may take a while on cloudy days.

After cleaning, treat with Textile Protector. The cleaning will become easier and will require mainly rinsing with clean water.

TEXTILE PROTECTOR

Batyline® is easy to clean with clear water and a pH-neutral soap. Stubborn stains can be removed with Synthetics Super Cleaner. If necessary, use a soft brush to remove dirt from the pores. Do not use acid, alkaline or chlorinated products that can harm the hardware of your furniture.

For extra protection we recommend Synthetics Protector which applies an invisible film and reduces the adhesion of dirt.

HOW TO MAINTAIN YOUR FURNITURE

Ceramic is very easy to maintain with clear water and a pH-neutral soap. Stubborn stains can be removed with Ceramic, Lava Stone & Glass Cleaner. To protect the ceramic, Ceramic, Lava Stone & Glass Protector can be used. This applies a highly water and soiling repellent coating, which also makes the surface brighter, smoother and easier to clean.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
