

TRIBÙ

T-TABLE

TRIBÙ STUDIO

The elegant T-Table with its refined proportions and elegant materials inspires daydreams of a glamorous 'la dolce vita' existence. Still water disturbed by a breeze is the visual reference for the T-Table. The light-reflective, handcrafted glazed lava stone top mirrors the sky and adds a unique quality with its naturally occurring imperfections. The glazing, adorned with a subtle crackle finish, makes the stone heat, water, UV and stain resistant. The pure and simple form of the T-Table, available in various heights and dimensions, is designed to fit harmoniously with other designs in the Tribù collection.

FABRICS & MATERIALS

MATERIALS

Frame: Stainless steel is an iron alloy in which the resistance to corrosion is increased by the addition of chrome, molybdenum and nickel. When exposed to air, a chromium oxide skin is formed spontaneously that protects the metal against rust. By powdercoating stainless steel, you can increase its corrosion resistance to the same level as that of aluminium. For its powdercoated stainless steel furniture Tribù uses 304L stainless steel that is ceramic blasted before it is powdercoated. Tribù always uses European, ultra-durable and scratch-resistant polyester powdercoating that guarantee a UV-resistance of 15 years.

Table top: Teak

Tribù prioritizes quality by exclusively using carefully selected, fully grown teak harvested from the top Indonesian plantations in East Java, adhering to strict environmental standards. Our local production, overseen year-round by our subsidiary Tribù Asia in Semarang under European management, ensures excellence. Teak, renowned as the finest wood globally, is chosen for its exceptional durability, stability, and resistance to water, weather, fungi, parasites, and insects. Harvested trees mature over 75 to 80 years before being ringed, dried, and sawn to ideal moisture levels of 8 to 12%.

Table top: Ceramic has been used for centuries for all kinds of purposes. With its unique characteristics it is the ideal material for outdoor table tops. Ceramic is UV-resistant, frost proof, extremely scratchproof and completely stain-repellent. The ceramic used by Tribù is coloured in the mass and guarantee years of carefree pleasure. The raw materials are selected very carefully by suppliers from Western and Southern Europe only. Every top is unique. For example, the Scisto colour may show subtle veins, but this is not the case for every top. The ceramic table tops are slightly bended so water can flow off.

Table top: handcrafted glazed Lava stone

Glazed lava is a unique and handcrafted material that expresses the natural aspect of lava stone. It offers the inherent strength of the volcanic stone combined with all the surface qualities associated with enamels. The density of the lava rock stone allows it to be used in one large piece. Once molten lava, the stone can withstand the very high temperatures used in the glazing process. Glazing makes sure the finished product is UV stable, impervious to water and resistant to heat, frost, chemicals and stains. It is very easy to maintain. Tribù chose for a subtle craquelé effect. As it is a natural product, you will find “aesthetic imperfections” that are just peculiar characteristic of both natural stone and handcrafted finishing. No table top in glazed lava stone will therefore be the same, making it so unique and attractive.

HOW TO MAINTAIN YOUR FURNITURE

MAINTENANCE

Stainless steel Powdercoated stainless steel is easy to clean with clear water and a pH-neutral fluid detergent. Stubborn stains can be removed with Aluminium Cleaner. If necessary, use a soft brush to remove the dirt from the pores. To protect the frame against the adhesion of dirt and to reduce fingerprints, Aluminium Protector can be used which applies an invisible protective film.

ALUMINIUM CLEANER
D9952

ALUMINIUM PROTECTOR
D9931

Treat new **teak** with teak protector 4 à 6 weeks after installation. Teak protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with teak super cleaner. Leave the furniture to dry completely and then apply teak protector. To avoid labour-intensive cleaning, you can treat the wood with teak sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.

Ceramic is very easy to maintain with clear water and a pH-neutral soap. Stubborn stains can be removed with Ceramic & Lava Stone Cleaner. To protect the ceramic, Ceramic & Lava Stone Protector (p. 187) can be used. This applies a highly water and soiling repellent coating, which also makes the surface brighter, smoother and easier to clean.

PROTECTION COVERS

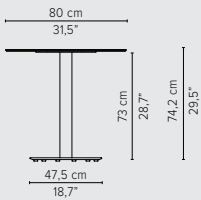

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
