TAO TABLES

MONICA ARMANI

The elegant Tao table collection is a lesson in perfectly balanced contrasts – bold sculptural pedestals and slim table tops that are pleasing to the touch. Designer Monica Armani has used refined lightened concrete to give a look of elegant solidity. The dining table has a central pedestal, which supports a finely milled round or oval table top. The coffee table plays tricks with symmetry by setting the finely milled square table top off centre.

MATERIALS

MATERIALS

Base & table top: lightened concrete

Concrete is a mix of recyclable, organic fibres without resins, with a very natural look. The organic fibres ensure high performance in technical and structural terms, making it very resistant to compression and bending.

The extremely dense microstructure with a low porosity means the concrete has a low sensitivity to the exposure of sea water, sulfates and acids. It also ensures a high resistance to abrasion.

The concrete is coloured in the mass; this ensures a long lasting original colour. The material is also resistant to frost and flame retardant. Typical of the material are the shiny spots and relief which are a result of the traditional production process.

Each furniture piece is hand finished by an Italian craftsman. This implies that every product is unique and different from another. Colour nuances between different productions may also occur.

Our TAO tables in lightened concrete do not contain gravel, like ordinary concrete, but a mix of quartz granulates and fibres, making the material a lot lighter. Nevertheless, it is very sturdy* and durable. Frost and heat have no influence and the colouring in the mass ensures that your table will retain its original colour for a long time.

HOW TO MAINTAIN YOUR FURNITURE

INFO & MAINTENANCE

Concrete

However, lightened concrete is a natural product and sensitive to stains. Despite the fact that we treat our tables with a concrete conditioner that reduces stains and moisture absorption, some caution is required, as with natural stone and marble. *We recommend a maximum load of 10 kg on the coffee table tops.

OIL, WAX & GREASE REMOVER
D9963 - 250ml

LIGHTENED CONCRETE CONDITIONER
D9962 – 500ML

For daily cleaning, dip a soft, clean cloth in a solution of warm, clear water and a pH-neutral fluid detergent. Rinse thoroughly and let dry. Stains should be wiped off immediately, especially acidic substances (juice, coffee, red wine, balsamic vinegar,...) since they may cause permanent stains. Also bird droppings and leaves may cause permanent stains if not removed immediately.

To protect your table, we recommend to use Tribù Lightened Concrete Conditioner regularly. However, this product does not protect against acidic substances. It can also be used for removing stains. Depending on the type of stain and its age, the stain can be completely removed or its intensity reduced. Lightened concrete contains natural fibers that can surface over time due to temperature fluctuations, which could feel slightly unpleasant to the touch. If this happens, we recommend to lightly hand sand the table top with a sanding disc making circular movements until the surface feels smooth again. Do not use corrosive or acidic detergents.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
