VIS À VIS

PIERGIORGIO CAZZANIGA / TRIBÙ STUDIO

The Vis à vis collection celebrates premium plantation teak. Slender teak platforms in the modular Vis à Vis sofa support comfortable all-weather cushions without any visible back or arm structure. The collection contains a lounger with integrated side table, that can connect to a parallel lounger. The dining table in different widths and lengths can be extended without any limit.

FABRICS & MATERIALS

MATERIALS

Frame and top:
Teak is a beautiful and long-lasting wood, which is stable and resistant to weather and water. The wood is high in natural oils, which leads to low moisture absorption and high stability. Additionally, the wood is resistant to fungi, parasites, and insects.
After 30 years, a tree has reached maturity. The trees have been ringed, eventually losing the majority of their sap and are felled and sawed up about two years later. Drying the wood is a critical step that determines how it will react later. Drying time and speed are determined by the thickness of the material to achieve the ideal moisture level between 8 and 12 %.
When it comes to quality, Tribù makes no concessions, using only carefully selected mature teak from three of the highest quality Indonesian plantations in Eastern Java, all of which meet the strictest environmental standards. Tribù Asia, a European-led organization, inspects local productions all year round.

Brackets for the cushions of the sofa:
Stainless steel is an iron alloy in which the resistance to corrosion is increased by the addition of chrome, molybdenum and nickel. When exposed to air, a chromium oxide skin is formed spontaneously that protects the metal against rust. By powdercoating stainless steel, you can increase its corrosion resistance to the same level as that of aluminium. For its powdercoated stainless steel furniture Tribù uses 304L stainless steel that is ceramic blasted before it is powdercoated. Tribù always uses European, ultra-durable and scratch-resistant polyester powdercoating that guarantee a UV-resistance of 15 years.

Top:
Travertine, a captivating natural stone, boasts unique characteristics and extensive applications. Formed by mineral deposits in natural springs, it features a distinctive porous texture that lends an elegant and rustic charm to both indoor and outdoor spaces. Its soft, neutral tones range from warm beige to cool gray, ensuring that every top is unique.
This originality is intensified by the stain-sensitive nature of the material. Oil, red wine, as well as other liquids and acids are absorbed, resulting in a permanent stain. This makes it a ‘living thing’ that, in time, displays subtle changes in colour and even surface structure. A product that becomes more and more unique with use, perfect for people who appreciate a table with personality.

CUSHIONS

The filling has a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

Explore our materials and fabrics using our product configurator available on each product page of our website

HOW TO MAINTAIN YOUR FURNITURE

Teak left in its natural state, is virtually maintenance-free. It can be left outside all year round, surviving even the most extreme weather conditions. New teak will experience natural oil surfacing that appears like a “watermark” or irregular pattern of discoloration. These areas are part of the natural maturing process and can be removed with gentle washing with Teak Super Cleaner.
Over time, untreated teak furniture which is exposed to sun and rain will turn silver grey. This process is cosmetic and does not harm the strength or quality of the wood.
To avoid the annual cleaning of the wood, you can apply Teak Sealer. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew. Teak Sealer can be applied to new teak or old teak furniture after it has been cleaned. We recommend using Teak Super Cleaner to clean soiled furniture. If Teak Sealer is applied every season, a simple cleaning with water and a pH neutral soap will do for years. Teak Sealer is a sealer and is not the same as varnish. It is breathable, letting the natural oils escape without bubbling or peeling like varnish.
Teak Protector protects the wood against stains and green deposit, without colouring the wood. We recommend to apply it after each cleaning.

For daily cleaning of **travertine**, rub with a soft clean cloth immersed in a solution of hot, pure water and a pH-neutral detergent. Rinse thoroughly and leave to dry. Spills should be wiped up immediately, particularly acids, which can stain. Bird droppings and leaves can also stain if not removed immediately. We advise you to cover your table with a protective cover when not in use.

Ceramic is very easy to maintain with clear water and a pH-neutral soap. Stubborn stains can be removed with Ceramic, Lava Stone & Glass Cleaner. To protect the ceramic, Ceramic, Lava Stone & Glass Protector can be used. This applies a highly water and soiling repellent coating, which also makes the surface brighter, smoother and easier to clean.

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
