

TRIBÙ

OTTO

MARC MERCKX

Otto was inspired by a rhythmic 'ribbon' pattern, often found in Italian bar counters from the '40s. Using merely one simple base element, Otto not only significantly preserves the precious teak wood. Like an ancient architectural pillar, the robust yet elegant patterned base supports a floating round & rectangle tabletop, making its durable and timeless design versatile to many outdoor settings.

FABRICS & MATERIALS

MATERIALS

Frame: plantation teak from East-Java.

Table top: teak, ceramic or **travertine** - a captivating natural stone, boasts unique characteristics and extensive applications. Formed by mineral deposits in natural springs, it features a distinctive porous texture that lends an elegant and rustic charm to both indoor and outdoor spaces. Its soft, neutral tones range from warm beige to cool gray, ensuring that every top is unique. This originality is intensified by the stain-sensitive nature of the material. Oil, red wine, as well as other liquids and acids are absorbed, resulting in a permanent stain. This makes it a 'living thing' that, in time, displays subtle changes in colour and even surface structure. A product that becomes more and more unique with use, perfect for people who appreciate a table with personality.

HOW TO MAINTAIN YOUR FURNITURE

MAINTENANCE

Travertine

For daily cleaning, rub with a soft clean cloth immersed in a solution of hot, pure water and a pH-neutral detergent. Rinse thoroughly and leave to dry. Spills should be wiped up immediately, particularly acids, which can stain. Bird droppings and leaves can also stain if not removed immediately. We advise you to cover your table with a protective cover when not in use.

Treat new **teak** with teak protector 4 à 6 weeks after installation. Teak protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with teak super cleaner. Leave the furniture to dry completely and then apply teak protector. To avoid labour-intensive cleaning, you can treat the wood with teak sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.

Ceramics have been used for centuries for all kinds of purposes. More recently the technology has evolved so rapidly that large surfaces can be made with ceramics. Table tops in ceramics are thus a brand-new application of a material that has stood the test of time. With their unique characteristics ceramics are ideally suited as basic material for outdoor table tops. They are UV-resistant, frost proof, extremely scratchproof and completely stainrepellent. The ceramics used by Tribù are coloured in the mass and guarantee years of carefree pleasure. Tribù laminates its ceramics on a layer of glass with a specific lamination process that has been developed specifically for this purpose, ensuring extra safety. Hitting the table with a hammer or other hard objects or

PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.
