DESCRIPTION
A subtle frame with attractive, curved armrests contrasts beautifully with the volume of the outdoor cushions, supported by a weave in broad textilene straps. Timeless and elegant, the Natal Alu Sofa is an outdoor sofa that will fit many terraces. With thirteen different modules, two different frame colours and nearly 120 available outdoor fabrics, the possibilities are endless. The frame in solid aluminium is powdercoated with an ultra durable polyester powdercoating for extra scratch and UV resistance. Special attention is paid to the outdoor cushions which can be left outside during the whole outdoor season thanks to the ventilating filling in a waterproof cover.

MATERIALS
- Frame: aluminium, powdercoated with an ultra durable polyester powdercoating
- Hardware: the different modules can be connected neatly by CNC cut solid powdercoated aluminium parts, making the assembled sofa look as one piece
- Seat surface: textilene straps, UV-, mildew- and rot resistant. Each strap is individually connected, allowing easy remplacement

CUSHIONS
The filling has a cover in a laminated, water-repellent polypropylene material which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra covering. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding. Fabrics available in category D, E & F.

PROTECTION COVERS
For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Nevertheless, they are not 100% waterproof. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE
Frame
Clean the aluminium frame with tap water and a PH neutral soap. For stubborn stains, use Aluminium Cleaner. We advise to use Teflon® Protector twice a year which applies an invisible film and protects the aluminium against the adhesion of dirt.

Textilene straps
The straps can be cleaned with Synthetics Super Cleaner. Apply with a soft brush. Leave to soak for a while and rinse with a garden hose.
