

# TAO TABLE

MONICA ARMANI

## DESCRIPTION

The elegant TAO table collection is a lesson in perfectly balanced contrasts – bold sculptural pedestals and slim table tops that are pleasing to the touch. Italian designer Monica Armani has used refined concrete to give a look of elegant solidity to this dining and coffee table. The dining table has a central pedestal, which supports a finely milled round table top. The coffee table plays tricks with symmetry by setting the finely milled square table top off centre. The TAO tables come in warm, natural linen and wengé tones to create striking centrepieces for any setting.

## MATERIALS

Lightened concrete treated with a colourless conditioner that minimises moisture and stain absorption, ensuring quick drying after a rainy period.

Lightened concrete is a mix of recyclable, organic fibres without resins, with a very natural look. The concrete is coloured in the mass which ensures a long lasting original colour. The material is resistant to frost and flame retardant. Typical are the shiny spots and relief which are a result of the artisan production process. Each top is hand finished by an Italian craftsman. This implies that every product is unique and different from another. Colour nuances between different productions may occur.

## COLOURS

10-Linen

89-Wengé

## PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

## MAINTENANCE

Clean the concrete table top with a soft clean cloth soaked in a solution of warm, clear water and a pH-neutral fluid detergent. Rinse thoroughly and let dry. Stains should be cleaned immediately, especially oily stains. To remove marks or stains, use Synthetics Super Cleaner and gently rub with a short-haired, soft brush. Do not use corrosive or acidic detergents. To restore the original shine to dull concrete surfaces, we recommend treating the surface after cleaning with protective wax. Apply with a clean, soft cloth to the dry surface.
